

Milo has 6 coins

What do you think he should do with them?

Draw the coins you would put into these three choices. You could also draw or write what you would spend them on or save them for or who you would give them to.

Spend

Save

Give

What if Milo had 15 coins? Or 21 coins ... or even 57 coins?  
What could he do then? Choose a bigger number to challenge yourself ... or maybe try your own number of coins!
